Reviewer Acknowledgment for the Year 2025

Journal of Public Policy Practitioners *(JPPP)* extends its sincere gratitude to the esteemed peer reviewers who generously devoted their time and expertise in the year 2025 (Volume 4). *JPPP* relies majorly on the critical evaluation provided by our dedicated reviewers, both local and international, to maintain the journal's high standards of core theoretical and practical knowledge of public sector and service delivery generated by the practitioners.

Although not sufficient, this publication serves as a formal acknowledgment of the reviewers' invaluable contributions, who, without any compensation, devoted their expertise and time to review manuscripts submitted for publication. Their insightful feedback and constructive criticism were critical in refining the quality of published research and enhancing the overall scholarly merit of the journal.

While the final decision regarding publication remains with the editorial board, the crucial role of the reviewers in framing these editorial decisions is instrumental. The profound impact of these 'unsung heroes' on the journal's success cannot be ignored.
